2.5.1 Mechanism of Internal/ External assessment is transparent, and the grievance redressal system is time-bound and efficient.

In terms of the evaluation process, RTMNU University norms are rigorously followed for both internal and external assessment. Two internal tests are carried out throughout the semester. Theory courses are evaluated in two ways: Direct method (80%), with university assessments, and indirectly (20%), using internal assessment. Laboratory course evaluation follows the same format as theoretical course evaluation. There are 50 marks assigned for practical, out of which 25 marks are for internal assessment and 25 marks for university evaluation done by external examiner appointed by university. In each laboratory session, the student is evaluated by viva questions and observations. Periodic project assessments are conducted to assess critical features such as problem formulation, project understanding, and presenting ability, communication of ideas, technical expertise, teamwork, and project management. This significant project is worth 200 marks. The project review committee performs review sessions to assess each project batch's progress.

To make sure that the Internal Evaluation system is effective and time bounded, the institute follows below practices:

1. Time period of Sessional exams and other internal exams, declaration of result and Parent-Teacher meet are presented in the academic calendar and communicated with students and faculties well in advance.
2. Timetables for all the internal exams are strictly prepared considering the dates given in the academic calendar.
3. Timetables of internal exams are communicated with the students prior to the week of the examination.
4. The paper pattern and the syllabus also have been mentioned in the notices related to the sessional exams.
5. Question papers are prepared by the faculties well in advance and also moderated by the moderation committee.
6. The exam committee makes all the necessary arrangements for conduction of the exams. Seating arrangements of students is displayed on the notice boards.
7. Invigilators are appointed by the examination committee and strict discipline is followed in the examination halls.

8. After the examination is over, answer sheets are distributed to the concerned subject teachers and the teachers are directed to complete the evaluation task within 4 days after the completion of exam.
9. Faculties distribute answer sheets to students in the classroom to check if there are any grievances.
10. If there are no grievances, then students are directed to sign on the answer sheets. If there are grievances related to any question or marks, it is solved by concerned subject teachers.
11. If there are any grievances apart from any individual subjects, then the exam committee addresses students and satisfies such grievances.
12. Results are displayed on the notice boards and Parent-Teacher meet is conducted by each department.

University Level Assessment

The institute follows norms of RTMNU related to university examination. The examination committee makes sure that students will receive examination timetables on time. It also makes sure that students will collect hall tickets before the 2 days of the exams. After the results, students can apply for revaluation of their answer sheets within a week if they are not satisfied with the marks awarded to them.
