Avi floral world, an insight in plantation and conservation

(By Mr. Nitin Marathe & Dr.M. Badge on 10/11/2022)

Allied Science department of Cummins college of Engineering for women, Nagpur arranged a guest session on Avi floral world, an insight in plantation and conservation for First year students in Student's Induction program. The awareness session was conducted by Mr. Nitin Marathe and Dr. Manas Badge, on 10th Nov 2022. The session focused on importance of tree plantation and its conservation. Mr. Marathe imparted the knowledge of bird plant relationship and its importance. He explained, when we plant a tree, we are not only planting a sapling but also hoping for the best. We have learned the hard way that trees are critical to our survival. We began by deforesting the earth to make room for more buildings. Later, when we saw the environment deteriorating, we were introduced to "afforestation," a simple process of planting more trees for a better future. Trees are essentially human and other living organisms' livestock. They have unconditionally provided us with food, oxygen, and a variety of other necessities for human survival, such as shelter, medicines, tools, and so on. Despite their rich values and importance, trees are still not properly cared for. They are cut down, eradicating all forms of life in the surrounding area.

More than 40 students attended the session. The awareness session was appreciated by students. Prof. R. Deshpande was the co-coordinator of the program.
